

Artistic Stone

About Artistic Stone

Artistic Stone manufactures a full line of lightweight stone products by casting in molds taken from nature's most select natural stones. Every style and texture is created by using our unique combinations of mineral oxide pigments, Portland cement, and natural lightweight aggregates. Even by the most discerning eye, our Hand Crafted stone captures the essence of nature's own creations.

Colorfast: Unlike other manufactured stones, Artistic Stone achieves the majority of its overall color through a substantial base pigmentation. This assures that there is color throughout the entire stone structure ("not just surface colors"). When Artistic Stone is cut or broken, during the installation, there will be no color difference on the interior. This major difference is just one reason why you can rest assured of the quality provided by Artistic Stone Products.
