

FAQS – Frequently Asked Questions about ArcusStone®

What is ArcusStone®?

ArcusStone® is a patented limestone coating, developed in Europe in the 1960s primarily for restoring historic stone structures. The stone is typically applied as a 3/8” coating over a stable substrate.

Ideal for commercial and residential projects as well as renovations, ArcusStone® is the dream solution when finish and texture are crucial to your project’s success.

Who is ArcusStone®, and how do we distinguish ourselves from our competition?

ArcusStone® is an organization of talented, artistic people, committed to pioneering affordable natural stone technology. Our goal is to create crushed stone plaster mixes, which can be applied and finished in the field or used in cast stone formulas. As such, the ArcusStone® can be textured, honed and finished like cut stone, or given the look of a more rustic field stone.

Why use ArcusStone®?

The primary advantages of ArcusStone® are:

Cost: Our applicators can create a stone finish at a fraction of the cost of purchasing, transporting, and installing cut stone and the material can be easily carved when wet.

Design flexibility: Because the material is in plaster form, it can be applied over any shape. Unlike cut stone, colors, textures, patterns and carvings can be controlled by the applicator.

Finish: The limestone mineral in ArcusStone® can be honed or polished to produce a natural stone finish – not a “faux” finish. That means it will look and wear better.

How do you use ArcusStone®?

Because ArcusStone® is a totally integrated and color coordinated system of natural limestone, the products can be used alone or in any combination. Our stone mixes are field applied by ArcusStone® Certified Applicators, and are also used by ArcusStone® licensed manufacturers who produce finished products at their factories. Factory products are available through applicators, dealers or the licensed manufacturers.

ArcusStone® - field applied limestone coating

ArcusStone® Plaster - field applied limestone plaster

Coated Foam - foam shapes coated with limestone coating

Tile - cementitious backer board coated with ArcusStone®

Cast Limestone - columns, fireplaces, architectural elements, etc.

Where is ArcusStone®?

ArcusStone® Products are sold through our certified local distributor, Circle Supply of Atlanta. Please contact us at the number below if you need more information about the products.

Circle Supply of Atlanta – Showroom open from 7am-4pm Mon-Fri.

4212 Northeast Expressway, Atlanta, Georgia 30340

Office: (800) 226-0691 E-mail: sales@circlega.com
